Mileage	81,000 miles	Engine	4.3L	ULEZ	Not compliant
Body type	Coupe	Power	275 BHP		

PRACTICALITY	
Doors	2
Seats	4

DESCRIPTION

This 2002 Mercedes-Benz CLK430 Avantgarde represents a classic example of the German manufacturer's engineering from that era. As an Avantgarde trim model, it combines the established build quality associated with the brand with the specific performance characteristics of the 4.3L petrol engine. This vehicle offers a straightforward driving experience, focusing on the mechanical reliability and comfort that defined this particular generation of the CLK series.

The inclusion of the 4.3L petrol engine provides a distinct level of power that sets this model apart from smaller engine variants within the same range. A notable benefit of this specific configuration is its low insurance group rating, which makes it a more accessible option for drivers who want a larger engine without the typical costs often associated with high performance vehicles. This combination of substantial engine capacity and manageable running costs makes it a practical choice for those seeking a balance between power and sensible ownership.
