DESCRIPTION

This 1998 Mercedes-Benz S Class represents a classic example of German engineering from a notable era of automotive design. As an S280 variant, this vehicle is powered by a 2.8-litre petrol engine, offering a smooth and refined driving experience that remains characteristic of the brand. The saloon body style provides a spacious interior, reflecting the build quality and attention to detail that Mercedes-Benz is known for. This particular model combines traditional luxury with the reliable performance expected from a vehicle of this heritage.

Choosing this S280 offers a distinct advantage for those who appreciate the solid construction and timeless aesthetic of late nineties luxury saloons. The 2.8-litre engine is well-suited for comfortable cruising, providing a balance of power and composure that sets it apart from smaller, less substantial vehicles of the same period. Its design prioritises passenger comfort and mechanical longevity, making it a practical choice for enthusiasts or collectors looking for a well-regarded executive car that maintains its composure on the road.
