DESCRIPTION

This 2012 Toyota Prius+ VVT-h T4 offers a practical solution for families needing extra space without compromising on efficiency. As a seven-seat vehicle powered by a 1.8-litre petrol hybrid engine, it balances passenger capacity with economical performance. The T4 trim level comes well-equipped with a fixed panoramic sunroof that adds a sense of openness to the cabin, while the head up display allows the driver to monitor key information without taking their eyes off the road. Convenience is further enhanced by the smart entry and smart start system, which allows for keyless access, alongside climate control air conditioning and Bluetooth connectivity for seamless mobile integration.

Choosing this model provides distinct advantages over many other family vehicles, particularly regarding running costs and daily usability. The hybrid powertrain is designed to be efficient, and the vehicle sits in a low insurance group, which helps to keep overall ownership costs manageable. The combination of seven seats and the advanced hybrid technology makes this an ideal choice for those who require a versatile and reliable car that remains economical to run on a daily basis.
